## **Committee Report**

File Number: 0360-01

DATE OF MEETING August 10, 2017

AUTHORED BY SHEILA GURRIE, CITY CLERK

SUBJECT KEY DATE CALENDAR

#### OVERVIEW

#### Purpose of Report

To obtain approval of the amended 2017 Finance and Audit Committee Key Date Calendar.

#### Recommendation

That the Finance and Audit Committee select the second Thursday of every month at 9:30 am as their meeting date and time.

#### BACKGROUND

At the June 14, 2017 Finance and Audit Committee meeting Staff were directed, by resolution, to determine a mutually agreeable date and time to hold Finance and Audit Committee meetings. Staff provided committee members with three options and the consensus was determined as the second Thursday of the month at 9:30 a.m. The location of meetings in the Board Room, Service and Resource Centre, will remain the same unless changed by notice.

#### **OPTIONS**

- 1. That the Finance and Audit Committee select the second Thursday of every month at 9:30 a.m. as their meeting date and time.
- 2. That the Finance and Audit Committee provide alternate direction.

#### SUMMARY POINTS

- Staff were directed to determine a mutually agreeable alternate date for Finance and Audit Committee Meetings.
- Committee members were provided with three options to choose from.
- The second Thursday of the month at 9:30 a.m. was determined as a mutually agreeable date and time.

DATE OF MEETING August 10, 2017

AUTHORED BY MARY SMITH, MANAGER, RECREATION SERVICES

SUBJECT TRAVEL ASSISTANCE GRANT – BOXING BC ASSOCIATION

#### **OVERVIEW**

#### **Purpose of Report**

To obtain Council approval of a request for a Travel Assistance Grant for the BC Boxing Association.

#### Recommendation

That the Finance and Audit Committee recommend Council approve the request from the Boxing BC Association for a Travel Assistance Grant in the amount of \$200 for two (2) Nanaimo Boxing Club athletes to attend the 2017 Imperium Cup being held in Terrebonne, Quebec during the period 2017-MAY-19 through 2017-MAY-21.

#### BACKGROUND

The City of Nanaimo provides a contingency account for amateur sports and cultural groups, and individuals to travel within B.C. (excluding travel on Vancouver Island) and out of province to a Regional, National or International Championship. These funds are available to sports and cultural groups qualifying in Provincial or Regional competitions and the current policy provides \$50 per person to a maximum of \$1,000 per application for travel within B.C., or \$100 per person to a maximum of \$2,000 per application for travel outside of B.C. Requests are considered on a first-come, first-served, basis as funds remain available.

Staff review all Travel Assistance Grant applications and forward the recommendation to the Finance and Audit Committee for recommendation to Council.

On 2017-MAY-17, Staff reviewed a Travel Assistance Grant application submitted by the Boxing BC Association in the amount of \$200 for two (2) Nanaimo Boxing Club athletes to attend the 2017 Imperium Cup being held in Terrebonne, Quebec during the period 2017-MAY-19 through 2017-MAY-21. Staff determined that this application met all of the grant criteria and recommend that Finance and Audit Committee approve the application.

#### **OPTIONS**

- That the Finance and Audit Committee recommend Council approve the request from the Boxing BC Association for a Travel Assistance Grant in the amount of \$200 for two (2) Nanaimo Boxing Club athletes to attend the 2017 Imperium Cup being held in Terrebonne, Quebec during the period 2017-MAY-19 through 2017-MAY-21.
  - **Budget Implication** To date there has been \$2,900 allocated from the 2017 travel grant contingency funds. If the above travel grant of \$200 is

approved, \$4,400 will remain available for any additional 2017 travel grant requests.

- Engagement Implication: Promotes excellence in sports and culture.
- 2. Deny the Travel Assistance Grant.
  - Budget Implication: To date there has been \$2,900 allocated from the 2017 travel grant contingency funds. \$4,600 will remain available for additional 2017 travel grant requests.

#### SUMMARY POINTS

- Funds are allocated yearly for Travel Assistance Grants.
- The group applying meets all of the required criteria.
- To date there has been \$2,900 allocated from the 2017 travel grants contingency funds and \$4,600 remains available for 2017 travel grant requests.

DATE OF MEETING August 10, 2017

AUTHORED BY MARY SMITH, MANAGER, RECREATION SERVICES

SUBJECT TRAVEL ASSISTANCE GRANT – NANAIMO LAWN BOWLING CLUB

#### **OVERVIEW**

#### **Purpose of Report**

To obtain council approval of a request for a Travel Assistance Grant for the Nanaimo Lawn Bowling Club.

#### Recommendation

That the Finance and Audit Committee recommend Council approve the request from the Nanaimo Lawn Bowling Club for a Travel Assistance Grant in the amount of \$100 for one (1) Nanaimo Lawn Bowler to attend the National Junior & U25 Lawn Bowling Championships being held in Dartmouth, Nova Scotia, during the period 2017-JUL-31 through 2017-AUG-07.

#### BACKGROUND

The City of Nanaimo provides a contingency account for amateur sports and cultural groups, and individuals to travel within B.C. (excluding travel on Vancouver Island) and out of province to a Regional, National or International Championship. These funds are available to sports and cultural groups qualifying in Provincial or Regional competitions and the current policy provides \$50 per person to a maximum of \$1,000 per application for travel within B.C., or \$100 per person to a maximum of \$2,000 per application for travel outside of B.C. Requests are considered on a first-come, first-served, basis as funds remain available.

Staff review all Travel Assistance Grant applications and forward the recommendation to the Finance and Audit Committee recommendation to Council.

On 2017-JUL-13, Staff reviewed a Travel Assistance Grant application submitted by the Nanaimo Lawn Bowling Club for a Travel Assistance Grant in the amount of \$100 for one (1) Nanaimo Lawn Bowler to attend the National Junior & U25 Lawn Bowling Championships being held in Dartmouth, Nova Scotia during the period 2017-JUL-31 through 2017-AUG-07. Staff determined that this application met all of the grant criteria and recommend that Finance and Audit Committee recommend Council approve the application.

#### **OPTIONS**

 That the Finance and Audit Committee recommend Council approve the request from the Nanaimo Lawn Bowling Club for a Travel Assistance Grant in the amount of \$100 for one (1) Nanaimo Lawn Bowler to attend the National Junior & U25 Lawn Bowling Championships being held in Dartmouth, Nova Scotia during the period 2017-JUL-31 through 2017-AUG-07.

- **Budget Implication:** To date there has been \$3,100 allocated or pending from the 2017 travel grant contingency funds. If the above travel grant of \$100 is approved, \$4,300 will remain available for any additional 2017 travel grant requests.
- Engagement Implication: Promotes excellence in sports and culture.
- Strategic Priorities Implication: State implication here, otherwise delete.
- **Political Implication:** State implication here, otherwise delete.
- Add Other Implications: State implication here, otherwise delete.
- 2. Deny the Travel Assistance Grant.
  - **Budget Implication:** To date there has been \$3,100 allocated or pending from the 2017 travel grant contingency funds. \$4,400 will remain available for additional 2017 travel grant requests.

#### SUMMARY POINTS

- Funds are allocated yearly for Travel Assistance Grants.
- The group applying meets all of the required criteria.
- To date there has been \$3,100 allocated or pending from the 2017 travel grants contingency funds and \$4,400 remains available for 2017 travel grant requests.

DATE OF MEETING August 10, 2017

AUTHORED BY DEBORAH DUNCAN, DEPUTY DIRECTOR, FINANCIAL SERVICES

SUBJECT AUTOMATED SOLID WASTE COLLECTION – EQUIPMENT FINANCING

#### **OVERVIEW**

#### **Purpose of Report**

To provide the Finance and Audit Committee with information regarding anticipated borrowing from the Municipal Finance Authority (MFA) to fund the purchase of trucks and bins for the implementation of automated solid waste collection.

#### Recommendation

That the Finance and Audit Committee recommend that Council approves the borrowing of up to \$6,200,000 through the Equipment Financing Program for implementation of automated solid waste collection.

#### BACKGROUND

Further to council's direction, the City is implementing automated solid waste collection services. This change in service delivery requires significant investment in new equipment including eight automated trucks and special wheeled carts for each household. Two automated garbage trucks were purchased in 2016 and were fully funded from the City's Equipment Replacement Reserve. Automated collection will be implemented in two phases: the first phase in late 2017 and the second and final phase in the spring of 2018.

Annual user fees are calculated and collected to fund the cost of residential solid waste collection in the City. Internal charges are included in those costs that contribute to the Equipment Replacement Reserve. The Equipment Replacement Reserve provides funding for replacement of the City's fleet.

Due to the implementation of automated solid waste collection most of the City's current garbage trucks will be replaced early. Therefore, there is not adequate funding available in the Equipment Replacement Reserve for the purchase of the remaining six automated garbage trucks. As well, the City will need to purchase wheeled carts for each residential household to accommodate automated collection. The business case presented to Council at meetings during 2016 and 2017 outlined that in addition to funding from the Equipment Replacement Reserve short term borrowing through the MFA would be required to complete the purchase of six additional automated garbage trucks and for all the wheeled carts. Repayment of the borrowing was included in projected user fees over the next five years.

Below is a summary of purchases and funding sources to complete the purchase of six additional automated trucks and wheeled carts. The funding sources include a \$144,000 grant from Fortis as an incentive to purchase CNG units.

|                          |        |                 | Funding Sources |          |       |              |
|--------------------------|--------|-----------------|-----------------|----------|-------|--------------|
|                          |        |                 | Equi            | pment    |       |              |
|                          |        |                 | Repla           | cement   | MFA   | - Equipment  |
|                          | #      | Cost            | Reserv          | e, Grant | Finan | cing Program |
| Automated Garbage Trucks | 6      | \$<br>2,600,000 | \$              | 900,000  | \$    | 1,700,000    |
| Wheeled Bins             | 72,000 | \$<br>4,500,000 | \$              | -        | \$    | 4,500,000    |
|                          |        | \$<br>7,100,000 | \$              | 900,000  | \$    | 6,200,000    |

The MFA provides equipment, short and long term borrowing to local governments and public institutions in BC. The MFA Equipment Financing Program provides short term borrowing (one to five years) under section 175 of the *Community Charter* and requires a Council resolution for each borrowing. This program offers low interest rates and no fees.

Staff recommend two borrowings through the MFA Equipment Financing Program: the first borrowing later this year to provide funding for the wheeled carts required for Phase 1 and a second borrowing in early 2018 to provide funding for the purchase of six automated trucks and the remainder of the wheeled carts. Each borrowing will be for five years. A summary of key borrowing information is provided below.

| Borrowing       | Current<br>Interest<br>Rate | Term    | Year Repaid | Annual<br>Payment | Тс | otal Interest<br>Expense | E  | stimated<br>Interest<br>qpense/<br>ousehold |

| \$<br>4,700,000 | 1.72%                       | 5 Years | 2023        | \$<br>981,672     | \$ | 215,006                  | \$ | 7.94  |
| \$<br>6,200,000 |                             |         |             | \$<br>1,294,972   | \$ | 283,625                  | \$ | 10.47                                       |
|                 |                             |         |             |                   |    |                          |    |   |

#### **OPTIONS**

- 1. The Finance and Audit Committee recommends that Council approve up to \$6.2 million borrowing through the MFA Equipment Financing Program.
  - **Budget Implication:** The funding strategy for automated solid waste collection can be reflected in the next 2017 2021 Financial Plan bylaw amendment.
- 2. The Finance and Audit Committee direct Staff to provide more information.
  - **Budget Implication:** The implementation of automated solid waste collection is on hold pending Council's direction.

#### SUMMARY POINTS

- Council approved phased implementation of automated solid waste collection with Phase 1 implementation in late 2017 and final implementation in the Spring of 2018. Two automated garbage trucks were purchased in 2016 and were fully funded from the Equipment Replacement Reserve.
- Implementation of automated collection requires the purchase of six additional automated garbage trucks and approximately 72,000 wheeled carts.
- Funding for additional trucks and wheeled carts will be from the City's Equipment Replacement Reserve, a Fortis grant and from borrowing through the MFA Equipment Financing Program.
- Repayment costs of all borrowing will be included in solid waste collection fees for the next five years
- The Finance and Audit Committee recommend that Council approves up to \$6.2 million borrowing through the MFA Equipment Financing Program for implementation of automated solid waste collection.

Victor Mema Chief Financial Officer

DATE OF MEETING August 10, 2017

AUTHORED BY JANE RUSHTON, MANAGER, PURCHASING AND STORES

SUBJECT QUARTERLY SOLE SOURCE AND SINGLE SUBMISSION PURCHASES

#### **OVERVIEW**

#### **Purpose of Report**

To provide the Finance and Audit Committee information on the City's Procurement Policy (03-1200-01) regarding; sole source, single submission purchases and policy compliance.

#### Recommendation

That the Finance and Audit Committee recommend that Council receive the Quarterly Sole Source and Single Submission Purchases report dated 2017-AUG-10 for information.

#### **DISCUSSION**

The City's Procurement Policy (03-1200-01) requires:

- 17. Reporting
  - 17.1 On a quarterly basis, Council will be provided with an information report summarizing the following:
    - 17.1.1 Sole source and single source purchases between \$25,000 and \$250,000;
    - 17.1.2 Award of all purchases in excess of \$250,000; and,
    - 17.1.3 Instances of Non-Compliance and action taken in each instance

This report outlines results of the above processes for information. Further details are summarized in Appendices 1, 2 and 3 to this report.

#### **Sole Source Purchases**

"Sole Source Purchase" means a non-competitive acquisition whereby the purchases for goods and or services are directed to one source where there is only one available Vendor or Contractor of that good and or service that meets the needs or requirements of the City. Sole source purchases go through an internal control review process and sign off covering justification, review of decision and costs.

#### **Single Source Purchases**

"Single Source Purchase" means a non-competitive acquisition whereby purchases for goods and or services are directed to one source because of standardization, warranty, or other factors, even though other competitive sources may be available.

Due to staffing constraints, the City is not able at this time to undertake internal audits or reviews to determine policy compliance deviations. The City's internal controls have been updated to flag non-compliance going forward using current staff and if it is determined that the related risks are significant additional resources will be requested from Council.

#### SUMMARY POINTS

- The City undertook seven (7) Sole Source purchases subject to Procurement Policy (03-1200-01) reporting for a total amount of \$300,835.36 for the period ending 2017-JUN-30.
- The City undertook four (4) Single Source purchases subject to Procurement Policy (03-1200-01) reporting for a total amount of \$1,790,529.90 for the period ending 2017-JUN-30.
- The City undertook two (2) Instances of Procurement Policy non-compliance purchases subject to Procurement Policy (03-1200-01) reporting for a total amount of \$274,757.51 for the period ending 2017-JUN-30.

DATE OF MEETING August 10, 2017

AUTHORED BY LAURA L. MERCER, MANAGER, ACCOUNTING SERVICES

SUBJECTCAPITAL PROJECT RESULTS FOR THE SIX MONTHS ENDING<br/>2017-JUN-30

#### **OVERVIEW**

#### **Purpose of Report**

To present the Finance and Audit Committee with a summary of the capital project results for the six months ending 2017-JUN-30.

#### Recommendation

That the Capital Project Results for the Six Months Ending 2017-JUN-30 dated 2017-AUG-10 be received for information.

#### **DISCUSSION**

Projects that satisfy specific requirements as outlined in the City's Capital Asset Policy are classified as capital expenditures and are accounted for in the City's capital funds. There are three (3) Capital funds: General Capital, Sewer Capital and Water Capital funds. Projects that are smaller in scope and below specific capitalization thresholds are classified as "operating projects" and are accounted for in the City's operating funds.

Funding for project expenditures comes from a number of sources including general tax revenues, operating and statutory reserves, grants and borrowing. Statutory reserve funding sources include Development Cost Charges, Equipment Replacement Reserve, Asset Management Reserve, Community Works Reserve and the Facility Development Reserve.

Unfinished projects at the end of the year are usually carried forward to be completed in the following year. Due to this, capital fund variances usually do not impact the operating surplus value.

Attached to this report is Appendix 2 which outlines the summary of the capital project results by project type for the six months ending 2017-JUN-30. The summary is divided into two sections: Concurrent projects (i.e.: projects undertaken together to minimize disruption and maximize cost and service efficiencies) and all other capital projects.

Each section has been broken out into the following categories; which are defined as follows:

| Status                 | Description   |
|------------------------|---|
| Completed              | Project is fully complete and no additional costs are expected                                  |
| Substantially Complete | Project is almost fully complete but there are a few minor costs still remaining to be incurred |
| In Progress            | Project is currently underway   |
| Not Started            | Project has not been started but is anticipated to start by the end of the year                 |
| Delayed                | Project has not been started or halted  |
| Other                  | Project that does not fit into the categories above   |

For projects that have a 'Completed' status and come in under budget, the unused funds that are not transferred to other capital projects are transferred back to general reserves and/or other initial funding sources as appropriate to fund future projects.

Appendix 1 provides a brief explanation for individual projects with a budget variance in excess of \$1 million dollars.

Appendix 2 lists the total year-to-date expenditures for each project. This listing illustrates at a glance the status of individual projects as at 2017-JUN-30 compared to the budget for the year.

The City of Nanaimo has a capital budget of \$58.5 million for 2017, which includes \$20.1 million of carry-forwards from 2016. This is represented by 245 projects: 49 projects are now complete; 114 projects are in progress; 53 projects have not started and 29 have been delayed or other; 34% of the 2017 budget has either been spent to-date or committed.

**Information Report** 

#### Appendix 1: Variance Analysis of the Summary of Capital Results for the Six Months Ending 2017-JUN-30

The following section provides an explanation of the significant project variances over \$1,000,000. Positive budget balance indicate that the project is under budget while a negative budget balance indicate that the project is over budget as at the date of reporting.

#### Departure Bay Area Utility Project

This concurrent project relates to drainage, sewer and water upgrades in the Departure Bay area. This project has been funded from general reserve funds (\$10,604), General Fund Asset Management statutory reserve funds (\$360,000) general sewer reserves (\$375,000) and general water reserves (\$928,130). This project is currently in design phase and will be tendered this Summer for construction in the Fall and Winter of 2017/2018.

#### Boundary/Northfield Intersection Upgrade

This project includes the upgrade of the Northfield Boundary Intersection and associated underground utilities. This project is in partnership with the Ministry of Transportation and Infrastructure who have agreed to contribute funding of \$1,395,487. The balance of the project is funded from general transportation reserve funds (\$267,626), general water reserve funds (\$30,000), ICBC contributions (\$95,000), and from the DCC statutory reserve funds (\$753,100). Council has directed staff to proceed with project after the project was put on hold for one year. The budget is being reviewed and project is anticipated to be tendered later this year.

#### Hammond Bay Corridor and Utility Project

This project relates to the road and water main upgrades in this area. The funding sources for this project are the Roads DCC Statutory reserve funds (\$853,061), Sewer DCC statutory reserve funds (\$257,501) and the General Fund Asset Management statutory reserve funds (\$786,900). This project is currently on hold as no bids were received when the project was tendered this Spring. As a result, the project will be delayed at least one year.

#### Property Acquisitions – School District Lands

This project is funded from the general property acquisitions reserve funds (\$1,500,000), strategic infrastructure reserve funds (\$600,000), Property Purchase reserve fund (\$900,000) and Parks DCC statutory reserve fund (\$1,100,000). This project is in progress.

#### DCC SS17: Millstone Trunk Sanitary Sewer

This project relates to the upsizing of sanitary sewer piping between Jingle Pot Road and Maxey Road to address capacity shortfalls. The funding sources for the year are Sewer DCC statutory reserve fund (\$1,902,667)) and general water supply reserves (\$577,500). Phase 1 of the project is substantially completed and phase 2 is anticipated to be completed this summer.

Emergency Water Supply Pump Station

This project relates to the construction of a new pump station from Harmac to Duke Point Supply Main. The funding sources for the year are Sewer DCC statutory reserve fund (\$1,902,667)) and general water supply reserves (\$577,500). Design is underway.

#### Port Theatre Expansion

This project relates to the rehearsal hall expansion at the Port Theatre. The funding sources for the year are Provincial grants (\$2,300,000) and fundraising and sponsorship contributions (\$3,400,000). The City of Nanaimo and the Port Theatre Society are currently working together to secure funding for this project. This project has not been started yet.

#### Bastion Bridge Rehab

This project relates to the rehabilitation and seismic retrofit of the Bastion Street bridge to extend its service life. The funding sources for the year are General Fund Asset Management statutory reserve fund (\$1,800,000) and general reserves (\$31,477). This project is currently not started but is in the que.

DATE OF MEETING August 10, 2017

AUTHORED BY LAURA L. MERCER, MANAGER, ACCOUNTING SERVICES

SUBJECT OPERATING RESULTS FOR THE SIX MONTHS ENDING 2017-JUN-30

### **OVERVIEW**

#### **Purpose of Report**

To present the Finance and Audit Committee with a summary of the operating results for the six months ending 2017-JUN-30.

#### Recommendation

That the Finance and Audit Committee recommend that Council receive the Operating Results for the Six Months Ending 2017-JUN-30 report dated 2017-AUG-10 for information.

### **DISCUSSION**

The intent of this report is to provide the Finance and Audit Committee with a summary of the City's financial operating results for the six months ending 2017-JUN-30 as compared to the 2017 Financial Plan.

Managers from all departments review monthly financial reports in order to identify budget variances as they occur, and to ensure that immediate action is taken to address any potential deficits.

Operating Expenditures Surplus/(Deficit) Surplus/(Deficit) Revenues Fund at June 30, 2017 Projected at Dec 31, 2017 General \$ 122,330,620 \$ 66,205,266 \$ 56,125,354 \$1,196,000 Sewer 11,511,987 12,645,364 (1, 133, 377)(98,000)Water 8,682,933 12,048,278 273,000 (3, 365, 345)\$ 142,525,540 \$ 90,898,908 \$51,626,632 \$1,371,000 **Total Surplus** Reserve required to fund disposals of capital assets and (\$1,200,000) Less: any associated gains or losses \$171,000 Net Surplus

Summary of Operating Position at 2017-JUN-30:

The projected net operating surplus for the year is \$1,371,000. However, each year, the surplus must be used to fund any disposals of tangible capital assets during the year, along with any gains or losses associated with the asset disposals. During the last five years the average

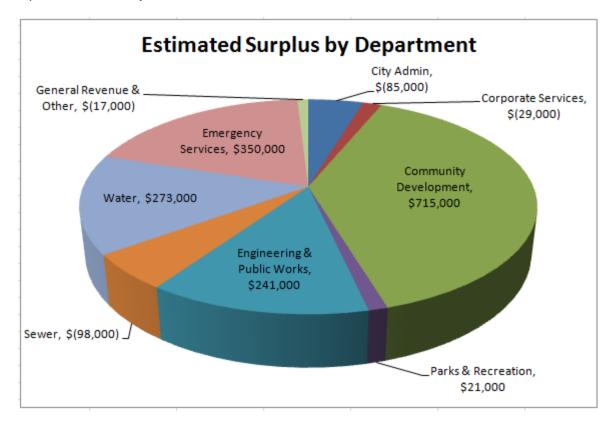

amount of funding required for tangible capital assets has been just over \$1,200,000, resulting in a net projected surplus of \$171,000.

Where significant variances over \$100,000 have been identified, Staff has provided comments in the departmental sections listed in **Appendix 1**.

The summary of operating results by department is documented at a more detailed level in **Appendix 2.** This report lists the total year-to-date revenues and expenditures for the functions within each department. This listing illustrates the overall status of an individual service as at June 30 compared to the overall budget for the entire year. The variance column displays the surplus or deficit for the year for each department. Positive values increase surplus, while negative amounts (displayed in parentheses) decrease surplus.

The projected surplus from operations of \$1,371,000 generated by each department is represented visually as follows:

Staff will continue to monitor financial performance on a monthly basis, and the Accounting Services department will continue to provide quarterly reporting updates.

### SUMMARY POINTS

- The overall projected operating surplus for the 2017 fiscal year is \$1,371,000, which is broken down between the general operating fund at \$1,196,000, the sewer operating fund at \$(98,000), and the water operating fund at \$273,000.
- A reserve of \$1,200,000 is required to fund any disposals of tangible capital assets and any associated gains or losses on disposal, resulting in a projected net surplus of \$171,000.
- On a monthly basis, department managers review financial reports to identify and address budget variances as they occur.

### **ATTACHMENTS**

- Appendix 1: Variance Analysis of the Operating Results for the Six Months Ending 2017-JUN-30 and Projections for the Year Ending 2017-DEC-31.
- Appendix 2: Summary of the Operating Results for the Six Months Ending 2017-JUN-30.

Laura L. Mercer Manager, Accounting Services

Victor Mema Chief Financial Officer

### <u>APPENDIX 1</u> <u>Variance Analysis of the Operating Results</u> for the Six Months Ending 2017-JUN-30 and Projections for the Year Ending 2017-DEC-31

On a monthly basis, each City department monitors its actual financial results as compared to the Financial Plan. The following section provides a summary of the projected surplus (deficit) by department for 2017, and also includes an explanation for significant variances over \$100,000.

### City Administration

The City Administration department shows year-to-date total revenues at 60% and expenditures at 49%, with a year end projected deficit of (\$85,000). Comments on the variances from budget over \$100,000 are as follows:

 Legislative Services – (\$182,000) – The majority of the deficit can be attributed to unplanned by-election expenses. The projected deficit is partially offset by position vacancies within City Administration.

### **Corporate Services**

The Corporate Services department shows year-to-date total revenues at 33% and expenditures at 47%. Based on the analysis of these accounts, at 2017-JUN-30, a net deficit of (\$29,000) is projected.

### **Community Services**

Community Services is broken down into four (4) main areas:

### Community Development

The Community Development department shows year-to-date total revenues at 85% and expenditures at 47%.

Based on the analysis of these accounts, at 2017-JUN-30 a year end surplus of \$715,000 is projected. The majority of the surplus is made up of the following items:

- Building Inspections \$515,000 The volume of building inspections has exceeded expectations in the first two quarters during 2017 and is projected to do the same for the rest of the year. This has resulted in a positive variance.
- Business Licenses \$114,000 The volume of business licenses issued has also exceeded expectations in the first two quarters and this trend is anticipated to continue throughout the year, resulting in a projected surplus.

### Parks and Recreation

The Parks and Recreation department shows year-to-date total revenues at 44% and expenditures at 45%.

Based on the analysis of these accounts, at 2017-JUN-30 there is a projected year end surplus of \$21,000. Items with variances exceeding \$100,000 are outlined below:

- Recreation Operations \$152,000 The surplus is due to some programs performing better than anticipated, including youth programs, adult programs, and weight room operations.
- Aquatic Operations (\$163,000) Aquatic revenues are projected to exceed budget by approximately \$158,000 due to increased admissions. However, this is offset by increased wage and benefit costs and aquatic supply costs required to maintain pool operations.

### Engineering and Public Works

The Engineering and Public Works department shows year-to-date total revenues at 47% and expenditures at 43%.

Based on the analysis of these accounts, at 2017-JUN-30, there is a projected year end surplus of \$241,000. The key variances over \$100,000 from budget are:

Engineering Services – \$112,000 – The projected surplus is due to temporary
position vacancies including the Manager of Construction and the Manager of
Transportation.

### <u>Utilities</u>

The Utilities department shows year-to-date total revenues at 59% and expenditures at 72%. Based on the analysis of these accounts, at 2017-JUN-30 there is a projected year end deficit of \$98,000 in the sewer fund and a projected surplus of \$273,000 in the water fund. Variances over \$100,000 from budget are outlined below:

Water – \$273,000 – The projected surplus can be attributed to \$40,000 from position vacancies, in addition to \$100,000 of projected surplus for a cross connection control program that isn't expected to commence until the last quarter of 2017. In addition, water contingency funds of \$100,000 are not anticipated to be required.

### Emergency Services

The Emergency Services department shows year-to-date total revenues at 78% and expenditures at 46%. Based on the analysis of these accounts, at 2017-JUN-30, there is a projected year end surplus of \$350,000. The key variances from budget are:

• Fire – \$209,000 – Fire operations are projected to generate a year end surplus which can be partially attributed to the operations of the Vancouver Island Fire Academy, and partially attributed to Worksafe BC recoveries that were not budgeted for.

### Other (VICC, Economic Development, and Corporate Facilities)

The Other category shows year-to-date total revenues at 52% and expenditures at 51%. Based on the analysis of these accounts, at 2017-JUN-30, there is a projected year end deficit of (\$42,000), which is made up of the following:

- Vancouver Island Conference Centre Operations (\$50,000) The projected deficit is due to lower than anticipated revenues and operating costs associated with switching the Management company that operates the Conference Centre.
- Economic Development \$8,000 A minimal year end surplus is projected.

### General Revenues and Transfers to Capital

The General Revenues department shows year-to-date total revenues at 96% and expenditures at 66%. The majority of revenues in this department relate to property taxation which are all recorded in May and June of each year. Correspondingly, the majority of expenditures relate to tax payovers and transfers to reserve.

Based on the analysis of these accounts, at 2017-JUN-30 a year end surplus of \$25,000 is projected due to additional investment income. Increased investment revenue is anticipated due to the recent Bank of Canada interest rate increase.

SUBJECT DEVELOPMENT COST CHARGE BYLAW

### **OVERVIEW**

### Purpose of Report

To update the Finance and Audit Committee regarding the input received through the community engagement phase, to outline proposed amendments to the Development Cost Charge Bylaw based on that feedback and to seek direction with respect to the introduction of a new Development Cost Charge Bylaw.

### Recommendation

That the Finance and Audit Committee recommend that Council direct Staff to:

- 1. Prepare and introduce a draft Development Cost Charge Bylaw based on the framework outlined in this report; and,
- 2. Review and provide a report for Council's consideration on potential incentives for downtown development; including, but not limited to, the expansion of the existing tax exemption programs.

### BACKGROUND

The Finance and Audit Committee, at its meeting of 2017-MAR-23, received a Staff report and presentation regarding the Development Cost Charge (DCC) Bylaw review including a potential framework for the development of a new bylaw. At that meeting, the Committee recommended referral of the topic to the Public Works and Engineering Committee and Community Planning and Development Committee for their consideration, and directed Staff to initiate public engagement on the proposed development cost charge framework.

As part of this process and to assist in the public engagement, Staff prepared a DCC technical report (Attachment A) which outlines the role of DCCs, how they are calculated, the associated DCC projects, draft DCC rates and the substantive amendments proposed under this review.

As further outlined in the technical report, the substantive amendments under consideration included:

- Varied Roads DCCs Based on Location
- A New Approach to the Collection of Storm Water DCCs
- A New Category for Small Lot Development; and,
- Introduction of DCCs in Downtown

The appendices of the technical report also included a summary of each proposed DCC project including details on the estimated costing and the portion of those cost allocated to growth. Given the volume of this material, it is not attached to this report, but is available at:

http://www.nanaimo.ca/EN/main/departments/Finance/development-cost-charge-review.html

### DISCUSSION

### Community and Stakeholder Engagement - What We Heard

The proposed DCC review and associated framework was considered by the Public Works and Engineering Committee on 2017-JUN-14 and the Community Planning and Development Committee on 2017-JUN-20. In addition to a written report, the committees received Staff's presentation outlining the DCC review process, substantive amendments and draft DCC rates. At their respective meetings, both committees passed motions of support in principle for the proposed DCC framework.

Staff hosted a public open house at Beban Park on 2017-JUN-15 in order to provide the community the opportunity to learn more about the DCC review and to provide their feedback on the proposed framework. The open house, which was advertised through the newspaper and social media, drew approximately 25 members of the public. The public were invited to provide their comments via a feedback form at the meeting and on the City's website. A summary of those comments are attached to this report (Attachment B).

In addition to the public open house, two stakeholder sessions were hosted by Staff and a third by the Chamber of Commerce.

Through these engagement sessions, Staff heard concerns regarding two specific elements of the proposed DCC framework. These concerns are generally summarized as:

- 1. The proposed increase in commercial and industrial DCCs are too significant and will have a negative impact on development of these sectors; and,
- 2. The implementation of DCCs in the downtown will be seen as a disincentive to development in the core.

As of the time of the drafting of this report, three written submissions have been received. The submissions are attached (Attachment C).

### **Response to Community Engagement and Stakeholder Engagement**

### Commercial and Industrial Rates

The proposed increase in DCCs for commercial and industrial was partially the result of a revised cost allocation model for transportation related DCCs that is based on the model outlined in the Provincial Best Practices Guide. This approach uses vehicle trips generated by each category of use to distribute cost. While in Staff's opinion, the model results in an arguably more equitable distribution that allows the location of the use to be a factor, it did result in a

significant shifting of the cost of transportation related DCC projects from residential to commercial and industrial categories.

This model resulted in transportation DCCs for commercial increasing from  $24.80/m^2$  to  $73.94/m^2$  and industrial increasing from  $6.34/m^2$  to  $26.41/m^2$ . These increases were a substantial contributor to the overall increase in the DCC charge for each category with the total rate for commercial increasing from  $70.06/m^2$  to  $118.43/m^2$  and for industrial from  $17.90/m^2$  to  $38.05/m^2$ .

Based on the feedback received, Staff is recommending that the proposed roads distribution model be replaced with the model that has been used in the previous DCC reviews. By using the previous model, the transportation costs are no longer shifted as heavily onto commercial and industrial uses and the overall rates for these categories are reduced. Transportation DCCs for commercial will increase from  $24.80 \text{ /m}^2$  to  $33.31 \text{ /m}^2$  and industrial rates from  $6.34 \text{ /m}^2$  to  $8.49 \text{ /m}^2$ . The total charge for each category will increase from  $70.06 \text{ /m}^2$  to  $77.80 \text{ /m}^2$  for commercial and from  $17.90 \text{ /m}^2$  to  $20.13 \text{ /m}^2$  for industrial.

This reduction in commercial and industrial transportation rates will result in a further increase in residential rates. Transportation DCCs for single family lots will increase from the current rate of \$4266.19 to \$5824.08 per lot with the total City DCCs increasing from \$13,787.50 to \$15,347.07 per lot.

Likewise, multi family transportation DCCs will increase from the current rate of \$25.59/m<sup>2</sup> to \$35.09/m<sup>2</sup> with the total City DCCs increasing from \$82.70/m<sup>2</sup> to \$92.40/m<sup>2</sup>.

As the previous cost allocation model is based on persons per unit it does not allow for cost to be allocated based on the location of the use and, as such, the same rate will apply across the community.

|                                       | Current Total<br>City DCCs<br>(2008) | Transportation<br>DCCs<br>(original<br>framework) | Total DCCs<br>(original<br>framework) | Transportation<br>DCCs<br>(proposed) | Total City<br>DCCs<br>(proposed) |

\*lower rates were proposed in the downtown core

\*\*rates varied with location

A summary of the revised draft DCC rates are included as Attachment D.

### DCCs in the downtown

At present, DCCs are not collected in the downtown core/Old City neighbourhood. This area generally includes lands between the Millstone River, Pine Street and the waterfront.

DCCs are not intended to be used as an incentive for development and instead are to be established based on the capital cost burden resulting from new development. Under the guiding principle of benefiter pays, infrastructure should be paid for by those who will use and benefit from the installation of such systems. The proposed capital projects included in this DCC review include projects in the downtown core and projects that development in the core will directly benefit from. As new development in the downtown core will directly benefit from DCC projects, and as development here will also contribute to the capital cost burden created by all new development, DCCs are being proposed to be included in the downtown core.

With respect to incentivizing development in the core, there are tools that are available for Council's consideration. At present, Council has tax exemption programs to encourage the residential conversion of heritage buildings and to incent the development of new/upgraded hotels in the community. Tax exemption programs generally apply to the net improvements on a site for the City portion of taxes and under provincial legislation can be available for up to 10 years. A tax exemption program for new development in the downtown core is possible. Similar programs have been established in other BC communities in order to incent one or more types of development in their city centres. In addition to tax exemptions, tools such as grants and the reduction of fees (building permit fees) are available to Council.

In Staff's opinion, the collection of DCCs are necessary in order to ensure that sufficient funds are available in order to construct the infrastructure required for development. However, Staff acknowledges the concerns raised regarding the impacts on the downtown and recommend that consideration be given to the development of an incentive program to encourage development in the core.

### **Grace Period / Instream Protection**

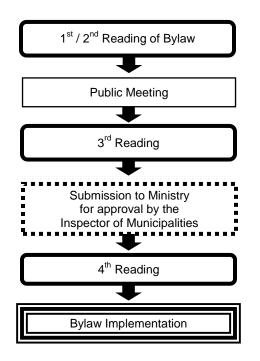

In acknowledgement of the impact new DCC rates may have on the development industry, Staff are recommending that the DCC Bylaw include an implementation date or "grace period" of 2018-MAR-01. As such, any building permit applications received prior to this date will be eligible for the existing DCC rates provided the building permit is issued within one year of the date of application. Staff is of the opinion that this date gives sufficient time for any project in the planning stages to make application.

In addition to the "grace period", provincial legislation provides in-stream protection to any development permit or rezoning application that is active at the date of adoption of the bylaw, provided the associated building permit is issued within one year.

### Next Steps

Based on the recommendations of the Finance and Audit Committee, Staff will proceed with the drafting and introduction of a new DCC Bylaw for Council's consideration. Although not a statutory requirement, Staff is recommending that the approval process include a public meeting prior to consideration of third reading. As noted below, DCC bylaws must receive provincial approval before they can be considered for adoption.

### **OPTIONS**

- 1. That the Finance and Audit Committee recommend that Council direct Staff to:
  - 1. Prepare and introduce a draft Development Cost Charge Bylaw based on the framework outlined in this report; and,
  - 2. Review and provide a report for Council's consideration on potential incentives for downtown development; including, but not limited to, the expansion of the existing tax exemption programs.
- 2. That the Finance and Audit Committee provide an alternative direction.

### SUMMARY POINTS

- The DCC Steering Committee has completed the work necessary to establish the framework for a new DCC Bylaw.
- Amendments to the proposed framework are being proposed based on the feedback received through the community and stakeholder engagement.
- If supported by the Finance and Audit Committee, a DCC Bylaw based on the revised framework will be prepared for Council's consideration.

### 1.0 Background

### 1.1 What are DCCs?

Like many other cities and towns in British Columbia, Nanaimo faces significant development pressure that in turn requires new or expanded infrastructure to support the demand development places on utilities and services. The costs associated with these infrastructure requirements create significant public sector financial burdens. To mitigate these financial pressures, Development Cost Charges (DCCs) are utilized as a cost recovery mechanism for apportioning infrastructure project costs amongst the developers of land.

Development Cost Charges (DCCs) are a method to fund infrastructure associated with growth. Monies are collected from land developers to offset some of the infrastructure expenditures

incurred to service the needs of new development. These Development Cost Charges are imposed by bylaw pursuant to the *Local Government Act* as a method to finance capital projects related to:

- Roads
- Drainage
- Sanitary sewer
- Water
- Parkland

### 1.2 History of DCCs in Nanaimo

The City of Nanaimo first introduced Development Cost Charges (DCCs) in 1982 in order to allow for the collection of monies to assist with the cost of infrastructure required for new growth. The current DCC bylaws were implemented on 2009-MAR-11 and allow for collection of DCCs for six categories: roads, sewer, storm, water distribution, water supply, and parks.

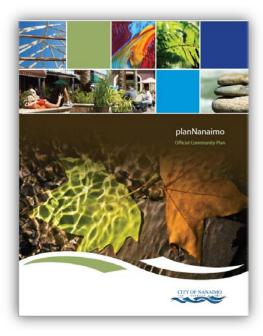

In addition to the City of Nanaimo DCCs, the Regional District of Nanaimo also has a Sanitary Sewer DCC that applies within the boundaries of the City. Although the City of Nanaimo collects this DCC on behalf of the RDN, the review and update of that program has been completed separately by the Regional District, and as such, was not included as part of this review. The existing and proposed Regional District Sanitary Sewer rates have been included in this report for convenience purposes only.

#### 1.3 Relevant Policy Documents

The DCC bylaw is intended to support the broader goals of the community, and as such, the City of Nanaimo's DCC program has been developed so as to be consistent with the:

- Regional District of Nanaimo, Regional Growth Strategy 2011
- Official Community Planning planNanaimo 2008
- Zoning Bylaw 2011
- Transportation Master Plan 2014
- Community Sustainability Action Plan 2012

### 2.0 Introduction

### 2.1 Best Practices Guide

The City of Nanaimo has followed the "Development Cost Charge Best Practices Guide" published by the Province of British Columbia's Ministry of Community Services for the formulation and administration of its DCC program. This guide builds on the general provision of the *Local Government Act* and encourages certainty and consistency in the development of DCC programs, especially in the area of cost charge calculation and bylaw administration.

### 2.2 Guiding Principles

As recommended by the DCC Best Practices Guide, the following guiding principles have been followed in the development of the DCC program:

### Integration

Development of DCCs must be consistent with community plans, land use plans, and corporate and financial plans.

### **Benefiter Pays**

Infrastructure should be paid by those who will use and benefit from the installation of such systems.

### Fairness and Equity

DCCs should distribute costs between existing users and new development in a fair manner. Further, those cost attributed to new development, should be equitably distributed between the various types of development.

### Accountability

All information on which DCCs are based should be accessible and understandable by stakeholders.

#### Certainty

Certainty should be built into the DCC process in terms of stable charges and orderly construction of infrastructure. Balance should be found between stability of DCC rates to assist the development industry, and to ensure sufficient financing is available for the construction of infrastructure in a timely manner.

### **Consultative Input**

The development of DCCs must provide adequate opportunities for meaningful and informed input from the public and other interested parties.

- 2.3 Service Area and Timeframe
  - 2.3.1 Area-Specific vs. Municipal-Wide

For this update, the City is proposing to maintain its current approach of a municipal-wide program.

Under a municipal-wide program, the same DCCs are charged to the same land use deemed to generate a similar capital cost burden regardless of the location of the development in the community. Under such a program, DCC contributions for each category type are pooled and can be applied to DCC projects throughout the city. The 'Best Practices Guide' recommends a municipal-wide approach.

2.3.2 Timeframe

This DCC review has been completed based on a 25-year timeframe (2017-2041).

### 3.0 How Calculated

In simplest of terms, DCCs are calculated by dividing the cost of new or upgraded infrastructure to support growth by that growth.

#### Cost of New Infrastructure to Service Growth

Growth

Projecting population growth along with the form and type of development, and determining the timing and costs of the associated infrastructure investment is challenging. Significant effort has been made during the current DCC review to collect and analyse this information.

#### 3.1 Projected Growth

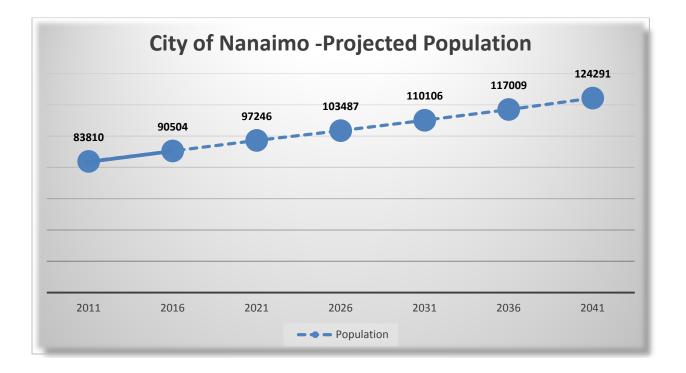

According to the most recent census data, the City of Nanaimo had grown to 90,504 residents by 2016.

As noted above, in order to determine DCCs, an understanding of future growth (including the type and form of development) over the timeframe of the program was required.

The growth projections used for this program review were based on work completed in support of the recent 2014 Transportation Management Plan. In addition, the City retained Colliers International to complete both Commercial and Industrial demand studies for the proposed timeframe. Based on this work, moderate growth was projected for the study period, including the following estimates:

<u>Growth rate</u> - avg 1.25% <u>Population</u> – 33 000 new residents by 2041 for population of approximately 123,500 <u>New Units</u> – 17,475 (55%multi and 45% single family) <u>New Commercial/Institutional</u> – 207,160m<sup>2</sup> (approximately 8,300m<sup>2</sup> per year) New Industrial – 218,479m<sup>2</sup> (approximately 8,700m<sup>2</sup> per year)

### 3.2 Project Assessment and Benefiting Factor

Capacity assessments and other programs have identified the infrastructure investments required to support the projected development. This work resulted in a compilation of projects and cost estimates for each type of infrastructure included within the DCC program: roads, drainage, sanitary sewer and water infrastructure and parkland. As part of this work, each project is evaluated in terms of the "benefiting factor" to the existing population versus future growth. Only the project costs attributed to growth are included in the DCC calculation.

### 3.3 Summary of DCC Projects and Capital Cost

In order to support the anticipated growth, 185 projects were identified through the DCC review. The total cost of these projects was identified as \$412,674,638. Once the benefitting factor was applied to each project, the total cost allocated to growth was determined to be \$311,026,271.

### 3.3.1 Sanitary Collection

| 25            |
|---------------|
| \$ 41,458,182 |
| \$ 10,563,007 |
| \$ 30,895,171 |
| -             |

-see Appendix A for further details on the Sanitary DCC projects

### 3.3.2 Drainage

| Number of Projects     | 12            |
|------------------------|---------------|
| Total Cost of Projects | \$ 27,729,167 |
| Allocated to existing  | \$ 12,436,049 |
| Allocated to growth    | \$ 15,293,119 |

-see Appendix B for further details on the Drainage DCC projects

### 3.3.3 Water Distribution

| Number of Projects     | 37            |
|------------------------|---------------|
| Total Cost of Projects | \$ 18,277,148 |
| Allocated to existing  | \$ 7,068,932  |
| Allocated to growth    | \$ 11,208,215 |

-see Appendix C for further details on the Water Distribution DCC projects

### 3.3.4 Parks

| Number of Projects     | 77            |
|------------------------|---------------|
| Total Cost of Projects | \$ 42,872,700 |
| Allocated to existing  | \$ 17,182,141 |
| Allocated to growth    | \$ 25,696,559 |

-see Appendix D for further details on the Parks DCC projects

### 3.3.5 Transportation

| Number of Projects     | 24              |  |
|------------------------|-----------------|--|
| Total Cost of Projects | *\$ 158,106,881 |  |
| Allocated to existing  | \$ 47,159,607   |  |
| Allocated to growth    | \$ 98,926,506   |  |

\*portion allocated to Province (provincial highway)

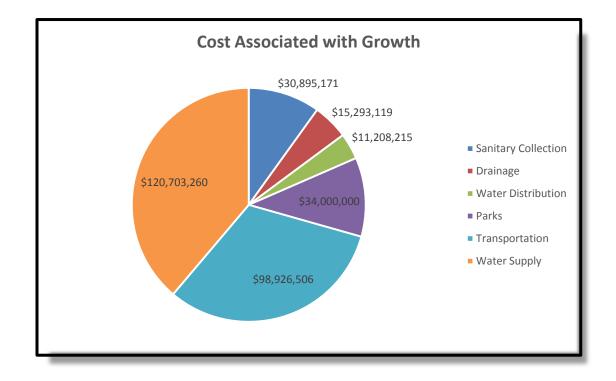

-see Appendix E for further details on the Transportation DCC projects

### 3.3.6 Water Supply

| Number of Projects     | 10             |
|------------------------|----------------|
| Total Cost of Projects | \$ 133,103,260 |
| Allocated to existing  | \$ 12,400,000  |
| Allocated to growth    | \$ 120,703,260 |

-see Appendix F for further details on the Water Supply DCC projects

### 3.4 Assist Factor

The Local Government Act states that the purpose of DCCs is to <u>assist</u> local governments in paying the cost of new infrastructure required for growth. As such, the legislation requires that 100% of the cost cannot be charged to new development and that the local government must establish an "assist factor". There is no regulation on the level of assistance required. The existing DCC bylaws were established with the minimum assist factor of 1% for all infrastructure types, with the exception of water supply which has a 25% assist factor. The proposed DCC framework has been drafted anticipating that the assist rates will remain unchanged.

Ultimately, the assist factor reflects Council's desire to encourage development and, as noted in the *Best Practices Guide*, is largely a political decision. If DCC rates are considered to be too high, Council could adjust the rates to one or more infrastructure types by increasing the assist factor. While such an increase would reduce DCC rates, project balances would need to be funded through general revenue and as such put further pressure on taxation and/or user rates.

### 4.0 Bylaw Administration

### 4.1 Collection

As per the legislation, DCCs can be collected at subdivision or at building permit stage. The present bylaws require a single family DCC payment for the subdivision of most single dwelling residential land with the remaining charges applicable upon the issuance of a building permit for commercial, institutional, industrial, and multi-family use. No changes are being proposed to the collection triggers under the revised DCC program.

<u>Single Family</u> – payment made at the subdivision approval stage, based on per lot created <u>Multi-Family</u> – payment upon issuance of the building permit, based on floor area <u>Commercial/Institutional</u> - payment upon issuance of the building permit, based on floor area <u>Industrial</u> - payment upon issuance of the building permit, based on floor area

### 4.2 Implementation Date

In acknowledgement of the impact new DCC rates may have on the development industry and in order to provide sufficient notification, the Best Management Practices recommends that communities establish a "grace period" before new DCC rates come into effect. As such, the associated adoption bylaw will state that the effective (implementation) date will be a time period from the date of adoption of the DCC bylaw. This period has not yet been defined for the adoption of this DCC program, but is anticipated to be 3-6 months.

### 4.3 In-Stream Protection

#### Subdivision Applications

Where an application for the subdivision of land has been submitted prior to the adoption of a DCC Bylaw, Section 511 of the *Local Government Act* provides "In-Stream" protection for a period of 12 months after the bylaw is adopted.

### Building Permits and Precursor Applications

Section 568 of the *Local Government Act* provides "In-Stream" protection if the application for a building permit or a precursor application (development permit or rezoning) has been submitted prior to the adoption of a DCC bylaw provided "the building permit is issued within 12 months of the date the DCC bylaw is adopted".

The In-Stream protection can be waived if the applicant agrees in writing that the bylaw should have effect.

#### 4.4 Exemptions and Reductions

#### 4.4.1 Exemptions

Based on the requirements and options provided under Section 561 of the *Local Government Act*, the current City of Nanaimo DCC program exempts DCCs from being payable in the following specific cases:

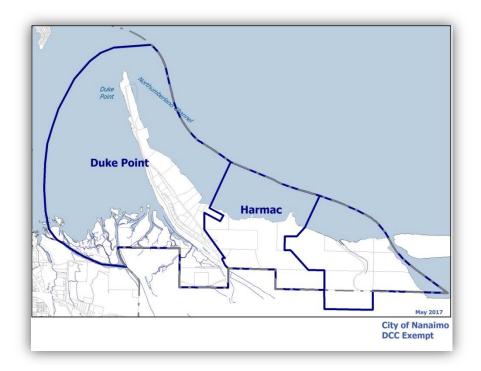

- where a building permit authorizes the construction, alteration or extension of a selfcontained dwelling unit that is no larger than 29m<sup>2</sup> in area, and is to be used solely for residential purposes.
- where the value of the work covered by a building permit does not exceed \$50,000.

These exemptions are in addition to a general exemption to any development that does not impose new capital cost burden on the municipality.

#### Duke Point and Harmac Area

Under the current DCC bylaw, the Duke Point Industrial Park is subject to only the Water Supply DCC, while the Harmac area is exempt from all DCC categories. These exemptions are based in part upon the fact that these areas are serviced by separate systems (e.g., RDN sewer collection and treatment at Duke Point and private

### 4.4.2 Reductions

The *Local Government Act* provides municipal governments the ability to waive or reduce DCCs for one or more the following categories:

- Not-for-profit rental housing, including supportive living housing
- For-profit affordable rental housing
- A subdivision of small lots that is designed to result in low greenhouse emissions
- A development that is designed to result in a low environmental impact

In order to provide a reduction, a bylaw must be adopted that provides specific detail on what constitutes eligible development, the amount of waiver, and any requirements that must be met in order to obtain the reduction.

Currently, the City provides for a 50% reduction for not-for-profit rental housing, including supportive housing that meets the following criteria:

(i) at least 50% of the fair market value of the real property on which the development is situated is owned by an eligible owner (eligible owner is considered the government of

British Columbia, the government of Canada, a local government, a public housing authority of a not-for-profit corporation incorporated under the *Society Act*);

- the cost to rent a unit in the development to at least 30% of the tenants does not exceed the Core Needs Income Threshold established for the City of Nanaimo by the BC Housing Management Commission;
- (iii) the land on which the development is to be built is owned by the City and held by the applicant under a lease, or the owner has entered into Housing Agreement with the City under Section 905 of the *Local Government Act* that has been registered against the title to the land on which the development is located; and
- (iv) the applicant has demonstrated to the reasonable satisfaction of the City that the development is eligible for a housing subsidy (either rent or capital) from the government of British Columbia, the government of Canada or a public housing authority.

No changes are proposed to the existing reduction for not-for-profit rental housing in the revised DCC scheme.

No additional reductions are currently proposed; however, through the development of the new DCC program and associated rates, consideration has been given to development that results in a lower environmental impact. These considerations are outlined in more detail in Section 5.1 Substantive Amendments.

### 5.0 Bylaw Framework

5.1 Substantive Amendments

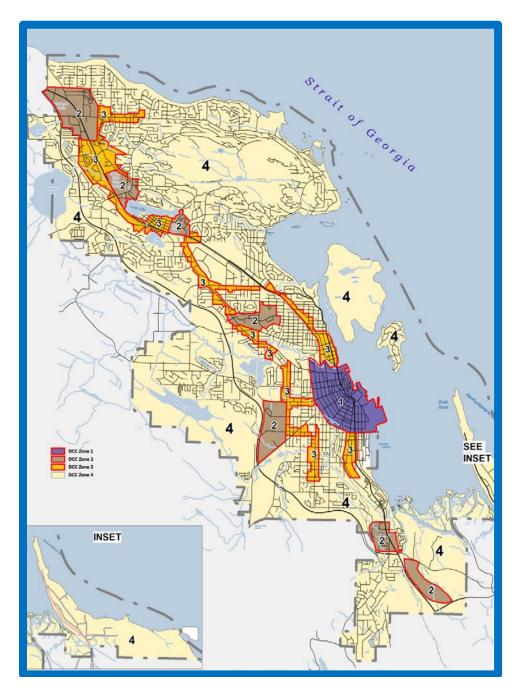

In addition to revised rates, the proposed DCC framework includes the following substantive changes over the existing bylaws:

### 5.1.1 Varied Roads DCCs Based on Location

The current Official Community Plan, Transportation Master Plan, and the Community Sustainability Action Plan all recognize that future residential development in the community should be concentrated in and around the established urban nodes. These combined policies are intended to better utilize the existing infrastructure and to encourage mixed-use walkable communities that can

support alternative transit. With the exception of the downtown core, the existing roads DCC bylaw does not reflect these policy goals, nor does the bylaw differentiate between developments within a designated growth node versus development elsewhere in the community. In order to address this issue, the draft DCC framework anticipates the establishment of different multi-family roads DCC rates based on the location of the development. The proposal is to create four areas with different DCC rates in each area in order to better reflect the capital cost burden of development, with lowest rates in the established mixed-use urban nodes.

#### 5.1.2 New Approach to the Collection of Storm Water DCCs

At present, the current DCC storm water bylaw establishes a rate for each square meter of floor area for a proposed use. As such, a one-storey building with 1,000m<sup>2</sup> of floor area pays the same rate as a 10-storey building with the same floor area, despite the fact the taller building covers less ground, results in less impervious surface, and ultimately less burden on the storm infrastructure. In order to address this issue, the new DCC framework proposes to collect storm water DCCs based on the footprint of the building.

The Local Government Act has given local governments the discretionary authority to waive or reduce DCCs for certain types of development to promote Low Impact Development (LID).

At present, the City requires that new development maintain storm water flows to their pre development 10 year peak flows and characteristics through the use of alternative rain water management methods and practices. Methods preferred are the use of landscaping, additional soils for absorption, pervious parking areas and ground water recharge rather than underground retention systems. Those onsite works capture day to day rain events to reduce runoff flows to nearby creeks and reduce negative impacts to creek habitat. That unmeasured runoff reduction at the property level does not remove the need for a City storm piping network which serves the purpose of protecting properties from flood events at a catchment wide level.

To promote LID, City staff reviewed the possibility of waiving or reducing Storm Drainage DCC. The developer would need to theoretically quantify the benefit (reduced flows) to downstream Storm DCC projects, measure reduction of flows in the City's Storm Drainage piping system and demonstrate that the benefit will endure in the long term.

At this time, the City does not wish to exempt any development under this Act for reduction of flows in the Storm Drainage piping system on account of:

- Rainfall science is continuously changing due to climate change and is challenging to predict.
- The waiving or reduction of Storm Drainage DCCs for implementation of LID should be based on the level of flow reduction achieved and measured with the LID method used on the property. The Storm Drainage DCC cost reduction, if any, will be difficult to quantify. This would require developers to pay and install complex flow monitoring systems in the storm drainage piping network to confirm the reduction of flows in the piping system. This would be an onerous undertaking for both the City and developers.
- The City has no resources to monitor and ensure that the LID methods used on the property are well maintained and have not failed. The unmonitored LIDs could be an unknown and a liability to the City.
- The City would need a plan to replace those assets before they failed, if owned by the City. The LIDs would be difficult to repair/upgrade if owned privately.

Implementation of LID practices would be certainly more attractive to developers if they could benefit from a Storm Drainage DCC credit, but the reduced demand on the Storm Drainage System resulting from the LID practices would need to be quantified, and all affected groups would need to be engaged and satisfied by the solution.

#### 5.1.3 New Category for Small Lot Development

Since the implementation of the existing DCC bylaws in 2009, amendments have been made to the City's zoning bylaw with respect to the development of small lots and the addition of a new housing form - row housing. At present, the DCC bylaws have a single rate for a single family lot regardless of the size of the property. The draft DCC framework is proposing a new category of DCC be established with a rate reflective of the capital cost burden created by a smaller property. For the purposes of the new bylaw, small lot is suggested to include a lot less than  $370m^2$  or a row housing lot. Note in the current zoning bylaw, single dwelling lots under  $370m^2$  are not allowed to contain a secondary suite.

#### 5.1.4 Introduction of DCCs in Downtown

As noted above, current DCC bylaws do not apply to development with the downtown. The DCC framework is proposing to no longer exempt the downtown core, but instead move towards a model which also recognizes the other urban nodes in the community. Roads / transportation DCCs are proposed to be the lowest in the downtown core as new development in this area is anticipated to have a lower capital cost burden.

#### 5.3 DCC Rates

#### Current Rates

The City of Nanaimo's last DCC Review was completed in 2008 and the rates went into effect in March 2009 as follows:

| Categories            | Single<br>Family<br>Dwelling | Multifamily<br>Dwelling | Commercial/<br>Institutional | Industrial            | Mobile<br>Home | Camp<br>Grounds |
|-----------------------|------------------------------|-------------------------|------------------------------|-----------------------|----------------|-----------------|
|                       | \$ per lot                   | \$ per m <sup>2</sup>   | \$ per m²                    | \$ per m <sup>2</sup> | \$ per unit    | \$ per unit     |
| Sanitary<br>Sewer     | \$916.07                     | 5.49                    | 5.33                         | 1.37                  | 559.56         | \$131.67        |
| Drainage              | 630.63                       | 3.78                    | 3.66                         | 0.93                  | 385.21         | 90.63           |
| Water<br>Distribution | 327.81                       | 1.97                    | 1.91                         | 0.49                  | 200.24         | 47.11           |
| Water Supply          | 5,912.26                     | 35.47                   | 34.36                        | 8.77                  | 3,611.38       | 849.74          |
| Parks                 | 1,734.54                     | 10.40                   | -                            | -                     | 1,062.15       | 300.61          |
| Roads                 | 4,266.19                     | 25.59                   | 24.80                        | 6.34                  | 2,605.92       | 613.16          |
| Total                 | \$13,787.50                  | 82.70                   | 70.06                        | 17.90                 | 8,424.46       | \$2,032.92      |

#### Proposed DCC Rates

| Categories            | Single<br>Family<br>Dwelling | Small Lot<br>SFD | Multifamily Dwelling |         |         | Comm<br>Institu | •                     | Industrial | Mobile<br>Home | Camp<br>Grounds |             |

#### 6.0 Next Steps

6.1 Community Engagement

Staff is recommending that prior to the drafting of the new bylaw, the proposed DCC framework be referred to both the Community Planning and Development and the Public Works and Engineering Committees for their review and input. In addition, opportunities for community engagement, including meetings with local stakeholders, are required. These groups would include, but are not limited to, the Chamber of Commerce, the Canadian Home Builders' Association, and the Vancouver Island Real Estate Board. Opportunities will also be provided for the general public to provide input with respect to the proposed DCC bylaw.

After introduction and prior to third reading of the amendment bylaw, Staff recommends that a public meeting be hosted by Council to receive input with respect to the draft bylaw.

### ATTACHMENT B

### SUMMARY OF FEEDBACK FORMS

#### Q. 5 Do you have any concerns with the proposed DCC program?

- No. Looks very appropriate, comprehensive and affordable for development.
- Social housing / student house should be exempt, or at least partially exempt.
- Yes. The loss of the downtown exemption.
- On large projects we require 2 years before new DCCs are implemented.
- Yes. The proposed increase is too low. This extra development is driving the need for very expensive dam and water system upgrades. Should raise DCCs to be comparable with Lantzville, Parksville and Qualicum.

# Q. 6 Do you have any suggestions for the DCC program or for the funding of infrastructure upgrades in general?

- Implement minor DCC cost upgrades / update every 2 years to keep up with inflation.
- DCCs must be reduced for student housing projects.
- Development must substantially pay for itself.

#### Attention: Dale Lindsay, Director of Community Development

Dear Dale,

#### Re: DCC Review

As a developer in the downtown area we are very disappointed to hear of the changes proposed for the DCCs. We are also concerned that we were not asked to participate in discussions surrounding these changes.

These changes show a regressive position with the city that will eliminate investment encouragement. We have spent millions of dollars in development in the area, but if DCC's are put back in for the downtown we would have to rethink our future plans for development.

We would like to be involved moving forward with discussions.

Yours very truly,

KGZ DEVELOPMENT CORP.

Monica Briggs

RECEIVED JUL 2 1 2017 CITY OF NANAIMO COMMUNITY DEVELOPMENT

July 20th, 2017

City of Nanaimo 455 Wallace Street Nanaimo, BC

#### Attention: Dale Lindsay, Director of Community Development

Dear Dale,

#### Re: DCC Review

The Old City Quarter Association would like to voice our concern with the DCC review.

We understand and agree that there is a need for increased monies for infrastructure expenditures. However, with the latest proposal and the reintroduction of DCCs in the downtown area we feel it will simply harm the economy and kill the development in the area. The downtown is just getting back on its feet and to put DCCs back into downtown construction costs will have a very negative effect.

We would ask that you have another look at the proposal and perhaps have more of the stakeholders from the downtown area involved.

Yours very truly,

#### **OLD CITY QUARTER ASSOCIATION**

Eric McLean

President

DATE OF MEETING August 10, 2017

AUTHORED BY JOHN HORN, SOCIAL PLANNER, COMMUNITY AND CULTURAL PLANNING

SUBJECT SOCIAL PLANNING GRANTS - 2017 RECOMMENDATIONS

#### **OVERVIEW**

#### Purpose of Report

To obtain Council approval for the 2017 Social Response and 2017 Community Vitality grant allocations.

#### Recommendation

That the Finance and Audit Committee recommend that Council approve the 2017 Social Response and the 2017 Community Vitality grant recommendations.

#### BACKGROUND

Each year since 2001, the City of Nanaimo allocates two social planning grants; the Social Development grant and the Community Service grant; providing a total of \$85,000 annually to non-profit societies and/or recognised faith groups to address social issues affecting Nanaimo residents.

The grants have been renamed to Social Response Grants (\$60,000) and Community Vitality Grants (\$25,000). The revised application guidelines (Attachment A) request that project proposals respond to the City's Strategic Funding priorities for the Social Planning grant program.

The City issued a call for proposals with a submission deadline of 2017-JUL-24. Three applications were received for the Social Response grant and five applications were received for the Community Vitality grant, representing a total funding request of \$197,040. Staff reviewed eligible applications relative to the grant guidelines, and recommend allocating a total of \$85,000 to five applicants.

#### 2017 Social Response Grant Program (\$60,000) Recommendations

| Intercultural Mental Health<br>Equity Project | \$59,800                      | \$59,800   |

| Street Wise Designs                           | \$24,240                      | \$0  |
|   | Equity Project Boots to Suits | Equity Project\$59,800Boots to Suits\$75,000\$24,240 |

#### 2017 Community Vitality Grant Program (\$25,000) Recommendations

| Community Kitchens                                | Bellies to Babies and Beyond                  | \$5,000  | \$5,000 |
|---|---|----------|---------|
| Central Vancouver Island<br>Multicultural Society | Community Cultural Competency                 | \$10,000 | \$0     |
| Nanaimo Region John<br>Howard Society             | Restorative Practice In School<br>Communities | \$7,000  | \$7,000 |
| Nanaimo Ladysmith Schools<br>Foundation           | Career Cruising: Inspire                      | \$10,000 | \$8,000 |
| Nanaimo Women's Resource<br>Society               | Small Ghosts                                  | \$6,000  | \$5,000 |
| OUCIETY   |   |          |         |

#### **OPTIONS**

- 1. That the Finance and Audit Committee recommend that Council approve the 2017 Social Response and the 2017 Community Vitality grant recommendations.
  - **Budget Implication:** The recommendations do not exceed the total available budget of \$85,000 for the 2017 Social Planning grants.
  - Strategic Priorities Implication: The Social Response and Community Vitality grant allocations are consistent with the strategic priorities established for the Social Planning grant program and with the City's *Community Value* of social equity.
- 2. That the Finance and Audit Committee provide alternative funding recommendations.

#### SUMMARY POINTS

- The City received eight eligible applications with a total request of \$197,040 for the Social Response and Community Vitality grant programs.
- The total grant budget is \$85,000. It is recommended that \$84,800 be allocated to five applicants.

### **Guidelines & Criteria**

# City of Nanaimo Social Planning Grants

#### Introduction

The City of Nanaimo recognizes the importance of fostering a socially sustainable community that nurtures a caring, healthy, inclusive and safe environment, and which empowers all of its citizens to realize their aspirations. The Social Planning function, housed within the Community and Cultural Planning section, has a mandate to support initiatives and actions that further the community's social objectives.

#### Purpose

The purpose of the Social Planning grant program is to assist organizations in responding to issues of a social nature with initiatives that enhance social cohesion, address the root causes and effects of poverty, contribute to the vitality of our community and foster social inclusion and social equity.

#### **Eligibility Criteria**

Organizations applying for funding must be based in Nanaimo and/or be proposing a project that primarily serves Nanaimo residents.

The following types of organizations are eligible to apply:

- A non-profit society incorporated under the BC Provincial Societies Act or federally designated as a registered charity ;
- A recognized religious group with ongoing activities and a congregation; or,
- A neighbourhood association recognized by the municipality.

#### **Strategic Priorities**

The City of Nanaimo's strategic funding priorities for the Social Planning Grant program are as follows:

- Social Equity (e.g. Projects addressing issues related to poverty or social exclusion)
- Community Diversity (e.g. Projects that support multiculturalism and the integration of newcomers)
- Community Wellness (e.g. Projects addressing the social determinants of health)
- Vibrant Neighbourhoods (e.g. Projects that build community by enhancing social connectivity)

Project proposals should respond to one or more of the above categories.

#### **Grant Categories**

There are two categories of Social Planning Grants, which are allocated on an annual basis:

- **Social Response Grants** (previously the Social Development Grant Program) Intended for initiatives and projects of a more significant scope. The total budget available for this category is \$60,000; individual applications for up to \$60,000 will be accepted.
- **Community Vitality Grant** (previously the Community Service Grant Program) Intended for projects of a smaller scale. The total budget available for this category is \$25,000; individual applications for up to \$10,000 will be accepted.
