Committee Recommendations

1. Establish a Downtown Working Group coordinating stakeholders to support police, social responders & city efforts to promote a safer Downtown District.
2. Develop a Community Services Office that will focus the business community, private and public security personnel in a coordinated effort.
3. Zoning changes should be adopted to permit the development of social services in all commercial areas of the city.
4. Social Services will work cooperatively with the police in providing different responses to individuals living on the street in three broad categories;

“The Street Entrenched – Predatory individuals”

“The Hard to Engage – who may contemplate change at some point”

“The New to the Street”
