### EXAMPLES OF FLYING OF UAVs IN OTHER MUNICIPALITIES IN BC

Municipality	Agreement Holders	Agreement location	Details of the agreement on public property	Reported Issues	Cost
City of Burnaby	Burnaby Lake "Hoods Up Flyers"	Burnaby Lake Park East Sportsplex Fields 3,4,5,6	<p>Booked times for the flying clubs, casual time when the field is not booked, and booked time when no flying can occur. Schedules are posted online.</p> <p>All model airplane flyers are required to join the club (so everyone is covered by the club's liability insurance) and no independent flyers are allowed. No recreational drone use is allowed in parks due to potential Transport Canada and privacy concerns.</p>	<p>Some conflicts with cricket players on weekend.</p> <p>Some members of the public will not follow warning signs and will enter fields when the aircraft are sanctioned to fly because they feel entitled.</p> <p>Some non-club members trying to fly with the club</p>	\$26.54 per member annually plus tax for the use of four fields.
City of Coquitlam	West Coast Radio Controlled Aircraft Flyers	Upper Coquitlam River Park on Pipeline Road	7 days a week. The park can be used temporarily until it is formally developed as part of a community park.	The park is next to a riparian area. Trees have been topped without permission to improve flying area.	\$40 per member annually.
City of North Vancouver	North Vancouver Radio Controlled Flying Club	Inter River Park	Booked times are visible online		No charge.
City of Richmond	Richmond RC Flyers	Manoah Steves Neighbourhood Park.	<p>Specific times and rules on one field</p> <p>Typically Monday nights from 5-9PM and Saturdays from 10AM-2PM</p>	Safety conflicts with playground and unskilled flyers. Bookings seem to help alleviate conflicts with user groups.	<p>Charged on days of use (honour system). The club lets staff know their field usage at the end of each month.</p> <p>Rate is \$4.50/hour for the use of 3 fields.</p>
