2.10.3 School Site Areas

The required site area should be based on a reasonable estimate of the eventual maximum nominal capacity of the school.

New site areas described below for elementary, middle and secondary schools are subject to the following exceptions:

- 1. Additional area requirements for sewage lagoons and septic fields will be considered on an individual basis
- 2. Topographical and/or other environmental conditions will be considered in acquiring additional land for the school building and playfields
- 3. Bus drop-off areas will be considered only where busing is required.
