### DESIGN RATIONALE

The site is located on the north bank of the Millstone River.

Typically, a woodland planting scheme consists of the canopy, sub-canopy, shrub and herbaceous layer.

These gardess will provide provice for the Eving spaces, on the north side, be a wind and dust filter and create habitate for widtle. The dominant green changes the perception of the space both forestandily and vertically. While the paths that seal residents that seal residents and the space and the seal residents of the seal residents. The seal residents of the seal resi
