Council

Bringing a presentation: Yes

Details of the Presentation: Low Carbon Energy Systems for New Builds in Nanaimo - Follow up meeting to the Presentation of April 29, 2019 asking for a declaration of climate emergency. This delegation will show why it is contrary to our interests to continue to allow methane gas hookups in new building because, with our fast growth, they are the cause of our emissions continuing to increase. It points out that fracked methane is harmful to health both in the production process and in homes. It points to the many benefits of electrification using heat pumps. It points to the importance of actually delivering on the excellent but ambitious targets proposed in the city plan.
