### Dear Members of the Board,

We are the homeowners of **520 Vancouver Ave**, a historic house built in 1932. We are seeking permission from the council to lift our house in place and install a foundation beneath it. Our historic home sits very close to the property line of our direct neighbors,

We have discussed our plans with them and they have given their full support for lifting the house in place. We have included their written approval as part of our application.

At present, one-third of our house is situated on a foundation, while the remaining two-thirds are supported by posts resting on cinder blocks. In order to meet current safety and code standards, we must lift the house and install a full foundation.

For both preservation and practical reasons, we believe it is most beneficial for the layout of our property to keep our house in its current location. Our neighborhood community, including ourselves, is deeply committed to restoring and maintaining the historic character of the area. Improving the house where it stands will allow us to contribute to this vision, bringing up to code a home which adds to the neighborhood's charm and heritage. Moving the house would not only significantly disrupt the established layout but would also eliminate our driveway, forcing us to park on the street and complicating the repositioning of our vital services, such as plumbing and electrical.

This project will allow us to bring a piece of local history back to life while ensuring the property is safe and livable for future generations. We believe this modest change, with minimal disruption to the surrounding properties, will only enhance the area and contribute positively to the ongoing restoration efforts in the neighborhood.

We ask for your thoughtful consideration and approval of our application, as we are excited to restore and preserve this historic home for our family and for the community.

Thank you for your time and consideration.

Sincerely, Isaac Bowden 520 Vancouver Ave
